(2) All of the governmental funds and expendable trust and agency funds are accounted for on the modified accrual basis of accounting. In accordance with this basis, revenues are recognized when they become susceptible to accrual; that is, when they become both measurable and available to finance expenditures of the fiscal period. Available means collectible within the current period or soon enough thereafter to be used to pay liabilities of the current period. Those revenues which are considered to be susceptible to accrual include amounts received during the 12 month period subsequent to June 30 that were earned as of June 30 and in the hands of receiving agents.

(3) Expenditures are recorded on an accrual basis when the related liability is incurred. Disbursements for prepaid expenses, inventory items, and fixed assets are recorded when expenditures are incurred. Expenditures for principal and interest on general obligation long-term debt are recognized when due.

**CALCULATION OF LEGAL DEBT LIMITS**

The State Constitution provides that the Legislature shall not create a debt or liability in any fiscal year which, together with any previous debts or liabilities, shall exceed one percent of total appropriations for that fiscal year unless the same shall be authorized by a law for some single object or been submitted to the people at a general election and has been approved by a majority of voters. These Constitutional Provisions do not apply to the creation of debt for purposes of war or to repel invasion, suppress insurrection, or to meet emergencies caused by disaster or act of God (Article VIII, Section 2, par. 3).

All general obligation bonded debt in New Jersey is entered into as a result of successful referenda. As the table below illustrates, the debt margin as defined in the Constitution would prohibit any other method of creating such debt and liability.
